
Auditor's opinion

The Foundation has made further improvements since its last summative assessment and continues to demonstrate a strong desire and mindset to be true to the spirit of the Shariah in educating and distributing Zakat. It has demonstrated the embedding of sound practices based on strong leadership and a work ethic with continuous improvement at its fore.

It now enters a new period of potential significant growth, and the expectation is that the Foundation continues to prove it has established robust governance protocols and sound practices that are not affected by this substantial change of volume.
